**Taking Design Thinking to School**-Shelley Goldman 2016-12-01 Design thinking is a method of problem-solving that relies on a complex set of skills, processes and mindsets that help people generate novel solutions to problems. Taking Design Thinking to School: How the Technology of Design Can Transform Teachers, Learners, and Classrooms uses an action-oriented approach to reframing K-12 teaching and learning, examining interventions that open up dialogue about when and where learning, growth, and empowerment can be triggered. While design thinking projects make engineering, design, and technology fluency more tangible and personal for a broad range of young learners, their embrace of ambiguity and failure as growth opportunities often clash with institutional values and structures. Through a series of in-depth case studies that honor and explore such tensions, the authors demonstrate that design thinking provides students with the agency and compassion that is necessary for doing creative and collaborative work, both in and out of the classroom. A vital resource for education researchers, practitioners, and policymakers, Taking Design Thinking to School brings together some of the most innovative work in design pedagogy.

**The Art of Effective Facilitation**-Lisa M. Landreman 2013 *How can I apply learning and social justice theory to become a better facilitator?*

*Should I prepare differently for workshops around specific identities?*

*How do I effectively respond when things aren't going as planned?*

This book is intended for the increasing number of faculty and student affairs administrators ? at whatever their level of experience -- who are being asked to become social justice educators to prepare students to live successfully within, and contribute to, an equitable multicultural society.

It will enable facilitators to create programmes that go beyond superficial discussion of the issues to fundamentally address the structural and cultural causes of inequity, and provide students with the knowledge and skills to work for a more just society. Beyond theory, design, techniques and advice on practice, the book concludes with a section on supporting student social action.

The authors illuminate the art and complexity of facilitation, describe multiple approaches, and discuss the necessary and ongoing reflection process. What sets this book apart is how the authors illustrate these practices through personal narratives of challenges encountered, and by admitting to their struggles and mistakes.

They emphasise the need to prepare by taking into account such considerations as the developmental readiness of the participants, and the particular issues and historical context of the campus, before designing and facilitating a social justice training or selecting specific exercises.
