Social Science, Philosophy and Theology in Dialogue-Pierpaolo Donati 2019-04-09 This volume explores the potential of employing a relational paradigm for the purposes of interdisciplinary exchange. Bringing together scholars from the social sciences, philosophy and theology, it seeks to bridge the gap between subject areas by focusing on real phenomena.Although these phenomena are studied by different disciplines, the editors demonstrate that it is also possible to study them from a common relational perspective that connects the different languages, theories and perspectives which characterize each discipline, by going beyond their differences to the core of reality itself. As an experimental collection that highlights the potential that exists for cross-disciplinary work, this volume will appeal to scholars across a range of field concerned with critical realist approaches to research, collaborative work across subjects and the manner in which disciplines can offer one another new insights.

Strange Country-Mark Dapin 2008-11-01 "This book is about the people I met as I crisscrossed Australia by train and plane and L-plated car: the undefeated dreamers and wild-hearted romantics, the obsessed hobbyists and beautiful failures. It is about heroes and legends, illusions, delusions and hope, and one or two men with shit for brains who ought to be locked up." As anyone who's ever read Mark Dapin's column and features in Good Weekend knows, he's an immensely funny, acute and vivid observer of Australian life. In Strange Country, he takes us on a journey through a very different Australia - a country that's eccentric, puzzling, big-hearted, small-minded, nostalgic and sometimes just plain mad. From the last travelling boxing tent to feral urban sewer rats to Vietnam Veteran bikies and the annual Parkes Elvis Festival, his writing illuminates the stranger side of Australian life in a travel book like no other.

Florida was a perpetual motion machine, destined to go on forever. After the Internet, Before Democracy-Johan Lagerkvist 2010 China has lived with the Internet for nearly two decades. Will increased Internet use, with new possibilities to share information and discuss news and politics, lead to democracy, or will it to the contrary sustain a nationalist supported authoritarianism that may eventually contest the global information order? This book takes stock of the ongoing tug of war between state power and civil society on and off the Internet, a phenomenon that is fast becoming the centerpiece in the Chinese Communist Party's struggle to stay in power indefinitely. It interrogates the dynamics of this enduring contestation, before democracy, by following how Chinese society travels from getting access to the Internet to our time having the world's largest Internet population. Pursuing the rationale of Internet regulation, the rise of the Chinese blogosphere and citizen journalism, Internet irony, online propaganda, the relation between state and popular nationalism, and finally the role of social media to bring about China's democratization, this book offers a fresh and provocative perspective on the arguable role of media technologies in the process of democratization, by applying social norm theory to illuminate the competition between the Party-state norm and the youth/subaltern norm in Chinese media and society.
